This publication presents a range of family, household and labour force statistics produced from the 1996 Census of Population and Housing for New South Wales and Jervis Bay. Detailed characteristics from the 1996 Census have been released in two stages. The first release, published in July 1996, consisted of demographic, social and housing data (*Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos 2015.0–2015.8)). This publication contains second release data comprising family and labour force characteristics. Similar publications are available for each State and Territory, and nationally.

The data presented in the publications relate to where people were enumerated on census night and therefore data for each geographical area include visitors to that area but exclude those people who were away on census night. They are not to be confused with the official estimated resident population (ERP) figures, which are based on census counts by place of usual residence (UR) and relate to 30 June. ERP figures are derived by including in the census UR counts the following:

- estimates of Australians overseas;
- an adjustment of estimated underenumeration; and
- adjustments for births, deaths and migration, between 30 June and 6 August 1996.

For comparative purposes, this publication includes summary information relating to 1991. This information is presented on 1996 geographic boundaries.

Census data presented in this publication represent only a selection of the full range of statistics that can be derived from the Census. For further information about other census or Australian Bureau of Statistics (ABS) data refer to the Appendix or the *Directory of Census Statistics*, 1996 (Cat. no. 2910.0). Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *Census Dictionary*, 1996 (Cat. no. 2901.0).

ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

Gregory W. Bray Regional Director

# SUMMARY OF FINDINGS NEW SOUTH WALES

# HOUSEHOLD CHARACTERISTICS

## HOUSEHOLD TYPE

There were 2,174,919 households in occupied private dwellings in New South Wales (NSW) in 1996, an increase of 9.4% since 1991 (1,987,265). Some 71.0% of these were family households, 21.9% were lone person households, and 4.0% were group households.

# Family households

Between 1991 and 1996, the number of family households in NSW increased by 7.0%, from 1,443,555 to 1,544,914. However, family households decreased as a proportion of all households (72.6% to 71.0%).

In 1996 at least four out of five households in the Statistical Subdivisions (SSDs) of Blacktown-Baulkham Hills (83.7%), Outer South Western Sydney (83.0%) and Fairfield-Liverpool (82.0%) were family households.

At the Statistical Local Area (SLA) scale, similar levels of family households were recorded in 15 areas. These included all of the SLAs in the SSDs named above, and Cabonne - Parts B (83.0%) and A (82.0%) and Hume (82.9%) in regional NSW.

## Lone person households

There was a marked increase (23.2%) between 1991 (386,439) and 1996 (476,246) in the number of lone person households in NSW.

The 14 SSDs where the proportion of lone person households was well above the State figure of 21.9%, were spread across the State. Three harbourside SSDs, Inner Sydney (33.5%), Eastern Suburbs (29.4%) and Lower Northern Sydney (29.0%) recorded the highest proportions.

Likewise, the highest concentrations of lone person households were recorded in the central metropolitan SLAs of Sydney - Inner and South Sydney (both 41.8%), followed by Newcastle - Inner (41.0%) and North Sydney (37.8%).

# Group households

In 1996 there were 87,312 group households in NSW, compared with 88,566 in 1991, representing a decrease of 1.4%. Newcastle - Inner (19.6%) recorded the highest proportion of group households and in eight SLAs close to Sydney's central business district the findings were more than double the proportion for NSW generally (4.0%).

# HOUSEHOLD SIZE

There was a mean (average) of 2.7 people per household in 1996, compared with 2.8 in 1991. At the SLA level, the findings ranged from 1.8 people per household in Sydney - Inner to 3.4 in Fairfield in western Sydney. It should be noted that this average excluded visitors to households and included usual residents who were absent on census night.

#### HOUSEHOLD INCOME

In NSW the median household income in 1996 was \$655 per week, representing a 12.7% increase over 1991 (\$581).

SSDs with the highest medians were Hornsby-Ku-ring-gai (\$1,070 per week) and Lower Northern Sydney (\$934). At the SLA level, median household incomes ranged from \$363 in Barraba on the northern slopes, to \$1,225 in Ku-ring-gai in Sydney's north. Except for Yarrowlumla - Part B (\$1,071), all seven of the SLAs with median household incomes over \$1,000 per week were in the metropolitan area.

# FAMILY CHARACTERISTICS

In the 1996 Census, 1,576,044 families were counted in occupied private dwellings in NSW, an increase of 7.9% over 1991 (1,460,700). Of these, almost half (49.8%) were couples with children, about one-third (33.6%) were couples without children, and 14.8% were one parent families. The proportion of couple families with children had decreased since 1991, (from 53.4%) but there were increases in couples without children (from 31.4%) and one parent families (from 13.1%).

## COUPLE FAMILIES WITH CHILDREN

## With dependent children

Between 1991 and 1996 the number of couple families with dependent children decreased (from 637,849 to 634,812). The proportion of couple families with dependent children declined from 43.7% to 40.3% of all families in occupied private dwellings.

The regional SLAs of Carrathool (50.8%), Windouran (50.0%), Conargo (49.5%) and Hume (49.3%), as well as Baulkham Hills (49.6%) in north-western Sydney shared high proportions of couple families with dependent children.

# With non-dependent children only

In NSW the proportion of couple families, with non-dependent children only, declined slightly from 9.8% in 1991 (142,536 families) to 9.5% in 1996 (149,977 families).

Couple families with non-dependent children only were mainly concentrated in Sydney's outer and middle-distance SLAs such as Concord (14.3%), Baulkham Hills (14.2%), Holroyd and Bankstown (both 13.3%).

# COUPLE FAMILIES WITHOUT CHILDREN

The number of couple families without children increased from 459,367 in 1991 (31.4% of all families) to 529,722 in 1996 (33.6%).

These families accounted for almost half of all families in Tweed Heads SSD (48.9%).

In two city SLAs — North Sydney (55.5%) and Sydney - Remainder (54.5%), and two coastal areas — Great Lakes (51.8%) and Maclean (50.2%), more than half of all families were couple families without children.

#### ONE PARENT FAMILIES

Between 1991 and 1996 the number of one parent families counted in occupied private dwellings in NSW increased by 21.6%, from 191,557 to 232,994.

In several SLAs widely dispersed across the State, over one in five families were one parent families: Sydney - Inner (28.3%), Brewarrina (22.2%), Byron (21.5%), Newcastle - Inner (21.3%), Bourke (20.9%) and Campbelltown (20.3%).

# LABOUR FORCE CHARACTERISTICS (Persons Aged 15 Years and Over)

## LABOUR FORCE

The labour force increased by 3.8% since 1991, from 2,702,680 to 2,806,544. This increase represented an increase in the number of employed people, partly offset by a decline in the number of unemployed people.

#### **EMPLOYMENT**

In 1996 there were 2,558,875 employed people in NSW, representing a 6.7% increase since 1991 (2,398,916). The proportion of the State's employed people counted in Sydney Statistical Division (SD) grew from 64.9% to 65.5%.

# Full-time

The percentage of full-time employed people in the State decreased (68.8% in 1996 and 70.0% in 1991). Upper Darling SSD (72.4%) and the metropolitan SSDs of Fairfield-Liverpool (73.2%), Lower Northern Sydney (72.7%), Inner Sydney (72.4%) and Central Western Sydney (72.3%) recorded high proportions of full-time employment.

At the SLA level, high percentages of full-time employment were noted in Sydney - Inner (81.2%) and North Sydney (78.2%) along with the regional areas of Windouran (79.6%), Unincorporated Far West (79.3%) and Conargo (78.1%).

# Part-time

The number of people employed part-time increased considerably (24.0%) between 1991 and 1996, from 597,694 to 741,211. The proportion of all employed people who were part-timers also increased from 24.9% in 1991 to 29.0% in 1996.

High proportions of part-time employment were recorded in the coastal SSDs of Tweed Heads (38.6%), Lower South Coast (38.3%), Clarence (36.2%) and Richmond-Tweed SD Balance (36.0%).

# Occupation

In 1996 the top four employing occupations in the State were Professionals (17.9%), Intermediate clerical, sales and service workers (16.2%), Tradespersons and related workers (12.7%) and Associate professionals (11.1%). Since 1991, while there had been proportional increases in Professionals (15.1% in 1991), Intermediate clerical, sales and service workers (12.0% in 1991) and Associate professionals (7.4% in 1991), the percentage employed as Tradespersons and related workers (13.8% in 1991) had declined.

#### Occupation continued

The proportion of Professionals exceeded the finding for the State as a whole in seven SSDs in Sydney (e.g. Lower Northern Sydney — 30.1% and nearby Hornsby-Ku-ring-gai — 29.7%). The six SSDs in which the highest proportions of Intermediate clerical, sales and service workers were recorded were in the outer areas of Sydney, (e.g. Outer South Western Sydney (18.7%), Central Western Sydney (18.3%)) and Queanbeyan (18.1%). High proportions of Tradespersons and related workers were recorded in areas of western Sydney, Illawarra and Hunter SDs e.g. the SSDs of Fairfield-Liverpool (17.3%), Hunter SD Balance (16.4%) and Illawarra SD Balance (16.0%).

The change at State level to a greater proportion of Associate professionals also occurred in all SSDs. For instance, Associate professionals comprised 8.6% of employed people in Lower South Coast in 1991, but 13.9% in 1996.

## Industry

In 1996 the top four employing industry Divisions in NSW were Retail trade (13.3%), Manufacturing (12.2%), Property and business services (10.6%) and Health and community services (9.3%), which were also the top four Divisions in 1991. Since then, there had been growth in the proportions employed in these service industry Divisions but a small decline in Manufacturing (12.8% in 1991).

The proportion of workers in Retail trade varied from 8.4% in Upper Darling SSD to 18.1% in Tweed Heads. Manufacturing varied more widely, ranging from 2.7% in Macquarie-Barwon to 22.7% in Fairfield-Liverpool.

The proportion of workers employed in Property and business services in 1996 was higher than in 1991 in all SSDs. Lower Northern Sydney (21.2%) had the highest proportion of workers in this Division. A similar trend was recorded for Health and community services, except for Snowy SSD, where the result may have been influenced by the high proportion of visitors counted in the Census.

# UNEMPLOYMENT

In 1996, 247,669 people were unemployed in NSW, a decrease of 18.5% from 1991 (303,764). In that period the unemployment rate also declined from 11.2% to 8.8%. Likewise, the unemployment rate for people aged between 15 and 24 years declined from 18.3% to 14.9%.

Especially high unemployment rates were recorded in the coastal SSDs of Clarence (17.1% of the labour force), Hastings (16.2%), Tweed Heads (15.9%), Richmond-Tweed SD Balance (14.9%) and Lower South Coast (14.3%), and Fairfield-Liverpool (13.8%). These areas also had the highest unemployment rates in 1991, although Fairfield-Liverpool moved from highest to sixth rank. The first four mentioned SSDs also recorded the highest rates for people aged 15–24 years in both 1991 and 1996.

# SUMMARY OF FINDINGS NEW SOUTH WALES continued

#### UNEMPLOYMENT continued

Several SLAs recorded very high rates overall as well as high rates for young people. Examples were Ulmarra (20.7% and 33.4% respectively) and Kempsey (19.6% and 29.3%) on the mid-north coast.

#### NOT IN THE LABOUR FORCE

Between 1991 and 1996 the proportion of the NSW adult population (15 years and over) not in the labour force increased from 36.6% to 37.9%.

However, in seven of the State's SLAs at least half of all adults were not in the labour force. Except for Bingara (50.9%) on the northern slopes, these areas were situated along the coast — for example, Maclean and Great Lakes (both 55.8%). In all seven areas, the proportion of people aged 65 years or more was well over the NSW figure of 12.7%.

# POST-SCHOOL QUALIFICATIONS

Since 1991, the proportion of the population aged 15 years and over with Basic vocational or higher level qualifications increased from 27.6% to 31.5%. The findings, by level of attainment, were:

- Bachelor degree or higher 10.9% (7.8% in 1991);
- Undergraduate or Associate diploma 6.5% (5.2% in 1991);
- Skilled vocational 10.9% (10.7% in 1991); and
- Basic vocational 3.2% (3.9% in 1991).

People with Bachelor degrees or higher level qualifications were concentrated in the waterside suburbs of northern and eastern Sydney, the SLAs of North Sydney (32.3%), Mosman (32.1%) and Woollahra (30.2%) recording the highest levels. In contrast, in the diverse SLAs of Lord Howe Island, Cabonne - Part A, Evans - Part A, Ku-ring-gai and Hornsby, more than one in every ten people reported having Undergraduate or Associate diplomas.

Several SLAs in the Hunter, Sydney and Illawarra regions recorded high proportions of people with Skilled vocational qualifications: Hawkesbury, Port Stephens, Wollondilly, Sutherland Shire, Lake Macquarie, Shellharbour and Singleton.

<sup>(</sup>a) The number of unemployed persons expressed as a percentage of the labour force.

#### BASIC COMMUNITY PROFILE

The key characteristics from the Census are summarised in a set of 32 standard tables which make up the Basic Community Profile (BCP). The first 16 tables (B01 – B16), which provided a range of social, demographic and housing characteristics, were published in *Census of Population and Housing:* Selected Social and Housing Characteristics for Statistical Local Areas (Cat. nos. 2015.0–8).

In the following pages, the BCP is completed by the inclusion of BCP tables B17 – B32, which provide family, household and labour force characteristics from the Census. Similar BCP tables are available for other geographic areas, including Local Government Areas, Postal Areas and Collection Districts.

For further information about the Community Profile Series, please refer to the Appendix — Census Products and Services.

SELECTED MEDIANS

### SUMMARY OF FINDINGS JERVIS BAY TERRITORY

### HOUSEHOLD CHARACTERISTICS

In 1996, 762 people were enumerated in the Territory of Jervis Bay, representing a decrease of 1.4% since 1991 (773). In the same period the average household size decreased from 3.5 to 3.4 persons per occupied dwelling (usual residents only).

Of the Territory's 140 households in occupied private dwellings, family households were the most common type, (82.9% in 1996 and 89.6% of 163 households in 1991). The proportional decline in family households was partly offset by an increase in lone person households (10.0% in 1996 and 6.1% in 1991). Between 1991 and 1996, the median household income increased from \$674 to \$732 per week.

### FAMILY CHARACTERISTICS

Of the 120 families, over four out of five (80.8%) were couple families and of those couple families, almost three-quarters (72.2%) included dependent children. One parent families accounted for the remainder (19.2%), a considerable increase over the 1991 figure (10.2%).

### LABOUR FORCE CHARACTERISTICS (PERSONS AGED 15 YEARS AND OVER)

In 1996, 449 people aged 15 years and over were employed, representing an increase of 17.8% over 1991 (381). The majority (88.4%) were full-time workers (87.1% in 1991).

Between 1991 and 1996, the percentage of people 15 years and over not in the labour force decreased from 21.9% to 19.1%.

In 1996, approximately half of the employed people worked as Tradespersons and related workers (25.2%), or Associate Professionals (24.9%).

The majority (81.1%) of employed people were in Government administration and defence, an increase since 1991 (75.9%).

The overall unemployment rate decreased from 12.0% in 1991 to 3.6% in 1996. Similarly, the youth (people aged 15–24 years) unemployment rate decreased from 11.4% to 2.1% in the same period.

Some 14.9% of people aged 15 years and over reported that they held Skilled vocational qualifications, representing an increase since 1991 (11.8%). On the other hand, the proportion with Bachelor degree or higher level qualifications (11.9%) had declined since 1991 (14.1%).

### SCOPE AND COVERAGE

- **1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.
- **2** The Census aims to count every person who spends census night in Australia. This includes Australian residents in Antarctica and people in the Territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people who spend census night in Australia but are excluded from the Census are foreign diplomats and their families.
- **3** The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The Census includes people camping out and the homeless.
- **4** All private dwellings, except diplomatic dwellings, are included in the Census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. are also included.
- **5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census Nature and Content* (Cat. no. 2008.0).

### STATISTICAL LOCAL AREA BOUNDARIES

- **6** The boundaries of SLAs are revised from time to time to accord with changes to Local Government Area (LGA) boundaries and to meet needs for small area information. The boundaries shown in this publication are those applying at the time of the 1996 Census. Further information on geographic classifications is contained in *Statistical Geography: Volume 1 Australian Standard Geographical Classification (ASGC), July 1996* (Cat. no. 1216.0).
- **7** Where necessary 1991 statistics in this publication have been recalculated to conform with the 1996 boundaries.

# BASIC COMMUNITY PROFILE TABLES B17 TO B32

**8** Tables numbered B17 to B32 contained in this publication are from *Census of Population and Housing: Community Profiles, Australia, 1996* (Cat. no. 2020.0). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to the Appendix.

### ABS POPULATION ESTIMATES

- **9** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. The Census can provide person counts based on place of usual residence at the geographic level of SLA.
- **10** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on census counts which have been adjusted to:
- include people who were in Australia on census night but were missed in the Census:
- include Australian residents who were temporarily overseas on census night (these people were not within scope of the Census); and
- exclude overseas visitors counted in the Census who were not usual residents of Australia.
- **11** The adjusted census count is updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.
- **12** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (Cat. no. 3201.0), produced annually.
- **13** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Population Projections* (Cat. no. 3222.0).

### DATA LIMITATIONS

- **14** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
- Partial non-response: In some cases where an answer is not provided to a
  question an answer is imputed (often from other information on the form). In
  other cases a 'Not stated' code is allocated.
- Processing error: While such errors can occur in any processing system, quality
  management is used continuously to improve the quality of processed data,
  and to identify and correct data of unacceptable quality.
- Random adjustment: Table cells containing small values are randomly
  adjusted or suppressed to avoid releasing information about particular
  individuals, families or households. The effects of these adjustments are
  statistically insignificant.
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- Undercount: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.
- **15** Further information on data quality is provided progressively in *Census Update* and in *1996 Census Data Quality Working Papers*.

### **OVERSEAS VISITORS**

**16** Census data for overseas visitors (who intended to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors do not contribute to any tables, with the exception of B22.

### LABOUR FORCE STATISTICS

- **17** The labour force statistics collected from the Census are valuable in providing data for small groups of the population. They are not to be confused with the statistics from the monthly Labour Force Survey, which are only available at State, Territory and capital city level.
- **18** Census figures differ from the survey figures because of differences in scope, questionnaire design and collection procedures. For more information refer to Census Working Paper 94/1: 1991 Census Data Quality Labour Force Statistics
- **19** Official monthly labour force statistics are published in *Labour Force*, *Australia* (Cat. no. 6203.0), produced monthly.

### CALCULATION OF PROPORTIONS

**20** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the proportion of family households was calculated by dividing the number of households which stated a form of family relationship by the total number of households (including those which did not report any relationship details) and expressing the result as a percentage.

### CALCULATION OF MEDIANS

- **21** A median is a measure of central tendency. It is a mid-value which divides a population distribution into two, with half the observations falling below it and half above. Unlike averages (means), medians are not usually skewed by extreme observations.
- **22** There are several issues to be aware of:
- The categories 'Partial income stated', 'All incomes not stated', 'Overseas visitor', and 'Not applicable' are not included in the calculation of median household income.
- If a median falls into a category that has a text only label then the median is set to 0. This is only relevant to the calculation of median household income, as the income classification includes categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing an open-ended range and the median falls within that range, the median is set to the number in the label. For example, in the calculation of median household income, if the median falls in the last range \$2,000 or more, \$2,000 is allocated as the median.

### UNADJUSTED DOLLARS

**23** The 1991 Census dollar values for median household income have not been adjusted into 1996 dollars.

### SYMBOLS AND OTHER USAGES

**24** The following abbreviations and symbols are used in this publication:

### APPENDIX CENSUS PRODUCTS AND SERVICES

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *Directory of Census Statistics, 1996* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication). Information is also available on the Internet, at http://www.abs.gov.au

### CENSUS REFERENCE PRODUCTS

### Census Dictionary

The *Census Dictionary, 1996* (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

### How Australia Takes a Census

*How Australia Takes a Census*, 1996 (Cat. no. 2903.0) provides information about the history of the Census, the planning process and the way in which the Census is conducted.

### Geographic classifications and codes

Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC), July 1996 (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

### 1996 Census Statistical Local Area maps

These reference maps show the SLAs from the 1996 Census. Each map shows the boundary of an SLA and the Collection District (CD) boundaries contained within.

# **Digital Boundaries**

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

### CENSUS DATA PRODUCTS

### Estimated Resident Population (ERP)

The ERP is the official population figure and is based on adjusting the results of the Census to provide more accurately the numbers of people usually living in an area.

The publication series *Population by Age and Sex* (Cat. nos 3235.1–8) contains ERP data, based on 1996 Census figures.

### Selected characteristics

This series of publications contains data and commentary on various characteristics from the 1996 Census at selected geographic levels. There are three sets of publications in the series:

- Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas, 1996 (Cat. nos 2015.0–8);
- Census of Population and Housing: Selected Characteristics for Urban Centres and Localities, 1996 (Cat. nos 2016.0–7); and
- Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas, 1996 (Cat. nos 2017.0–8).

# APPENDIX CENSUS PRODUCTS AND SERVICES continued

### Community Profile Series

The *Census of Population and Housing: Community Profiles, Australia, 1996* (Cat. no. 2020.0) provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- Basic Community Profile (BCP) contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the States, Territories and Australia.
- *Time Series Community Profile* contains 21 tables of variables from the BCP comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- Usual Residents Profile contains 25 tables based on the usual residents of SIAs.
   This is the only community profile based on place of usual residence.
- Expanded Community Profile contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- Working Population Profile contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work study areas — usually capital cities.
- Indigenous Profile (IP) is available in two formats. The Summary Indigenous Profile contains selected characteristics of Indigenous people in three tables which are available at the Indigenous Location level. The Detailed Indigenous Profile provides 26 tables available for Indigenous Areas, Aboriginal and Torres Strait Islander Commission Regions, States and Territories.

CDATA96

*Census of Population and Housing: CDATA96* (Cat. nos 2019.0–8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

KEYDATA

Census of Population and Housing: CENSUS KEYDATA, Australia, 1996 (Cat. no. 2023.0.30.001) is a CD-ROM product which provides access to 1996 Census Community Profiles, Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

SEIFA

Census of Population and Housing; Socio-Economic Indexes for Areas (SEIFA), August 1996 (Cat. no. 2033.0) are lifestyle groupings of Australia's communities. They provide information and rankings for a wide range of geographic areas based on five indexes which group Australians according to their social and economic conditions.

### APPENDIX CENSUS PRODUCTS AND SERVICES continued

### Classification Counts

Census of Population and Housing: Classification Counts, Australia, 1996 (Cat. no. 2022.0) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State and capital city.

### Census Household Sample File

The *Census of Population and Housing: Household Sample File, 1996* (Cat. no. 2037.0) is a CD-ROM product which will provide a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

### Social Atlas Series

The *Social Atlas*, *1996* (Cat. nos 2030.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

# Australia in Profile — A Regional Analysis

*Census of Population and Housing: Australia in Profile* — *A Regional Analysis, 1996* (Cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

### **CONSULTANCY SERVICES**

The following census specific services are available:

### Thematic Profile Service

The *Thematic Profiles Service* provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

### Customised Profile Service

*The Customised Profiles Service* provides community profile data tailored to your needs, on a variety of media.

### Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs, on a variety of media.

### Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census geographic areas and their characteristics (e.g. area).

# **Customised Mapping Service**

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *Census Dictionary*, 1996 (Cat. no. 2901.0).

### Couple family

This is a family based on two persons who are in a registered or de facto marriage and who are usually resident in the same household. The family may include any number of dependants, non-dependants and/or other related individuals. As it is not necessary for a parent-child relationship to be formed, a couple family can consist of a couple without children.

### Dependent child

A dependent child is an individual who is either a child aged less than 15 years or a dependent student. To be regarded as a child the individual can have no partner or child of his/her own usually resident in the same household.

A dependent child must be attached to a nominal parent with whom he/she usually resides. This parent must be over 15 years of age.

### Dependent student

A dependent student is defined as a natural, adopted, step or foster child who is 15-24 years of age and who attends an educational institution as a full-time student, and who has no partner or child of his/her own usually resident in the same household.

Boarders and lodgers living with a family are automatically excluded from all family coding once they are 15 years or older unless some familial relationship is also present. The family relationship then takes precedence over the fact they are boarders or lodgers.

### Dwelling

A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages are not counted in the Census.

There are private and non-private dwellings.

A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; an occupied dwelling in a Manufactured Home Estate; an occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land.

An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.

### Family

A family is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.

Non-related persons living in the same household are not counted as family members (unless under 15 years of age).

Geographic areas

The tables in this publication are at the levels of Statistical Local Area, Statistical Subdivision and Statistical Division, as defined by the 1996 Census edition of the Australian Standard Geographical Classification (ASGC).

Statistical Local Area (SLA): These areas consist of one or more whole Census Collection Districts (CDs) and cover, in aggregate, the whole of Australia without gaps or overlaps.

SLAs correspond in many cases to Local Government Areas (LGAs). The main exceptions are:

- where the boundaries of one or more Statistical Subdivisions (SSDs) cut across an LGA, the LGA is split into two or more parts, each of which forms a separate SLA;
- where a particular LGA is substantially different from other LGAs in terms of size and economic significance, or in terms of user needs for statistics, the LGA may be split into two or more SLAs. For example, the City of Brisbane covers a large area and is split into 163 SLAs while most LGAs in Victoria are split into two or more SLAs following the recent restructuring of local government in that State:
- where an area is unincorporated (i.e. not part of an LGA) an SLA is created.

*Local Government Area (LGA)*: LGAs are spatial units which represent the whole undivided geographic area of responsibility of either:

- an incorporated local government council; or
- an incorporated community government council (CGC) where the CGC is of sufficient size and statistical significance.

LGAs cover only part of Australia. The major areas not covered by LGAs are the large northern parts of South Australia, most of the Northern Territory, and all of the Australian Capital Territory and Other Territories. For the 1996 Census, LGA boundaries are as defined on 5 August 1995 and included in the 1996 Edition of the ASGC (effective 1 July 1996).

*Statistical Subdivision* (SSD): These areas consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical Division (SD): These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the three Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands together form the single SD of Other Territories. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

State/Territory: States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 1996 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, the Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands.

Geographic areas continued

In the ASGC, the Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands are combined to form Other Territories.

Codes for States and Territories are as follows:

- 1 New South Wales
- 2 Victoria
- 3 Queensland
- 4 South Australia
- 5 Western Australia
- 6 Tasmania
- 7 Northern Territory
- 8 Australian Capital Territory
- 9 Other Territories

More information about definitions, and lists of codes and names of the geographic areas can be found in *Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC), July 1996* (Cat. no. 1216.0) effective date 1 July 1996.

### Household

A household is a group of people who usually reside in the same private dwelling. In this publication, households are classified to three main types:

Family bousehold — a household consisting of two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.

A household can contain one or more families. Thus the number of families living in occupied private dwellings may be more than the number of family households.

Lone person household — a person who makes provision for his/her own food and other essentials in living, without combining with any other person to form a multi-person household. He/she may live in a dwelling on his/her own or share a dwelling with another individual or family.

*Group household* — a household consisting of two or more unrelated people where all persons are aged 15 years or over. There are no reported couple relationships, parent-child relationships or other blood relationships in these households.

### Household income

Household income is the sum of the personal incomes of each resident aged 15 years or more present in the household. Persons who were temporarily absent on census night, or had nil or negative income, or did not state their income, do not contribute to household income.

Although visitors' incomes are excluded in the calculation of household income, household income is still calculated for households that comprise only visitors, in order to collect data on household incomes in holiday resorts.

### Household size

Mean (average) household size is the average number of persons usually resident in a private dwelling. Therefore, the number of usual residents in a household excludes visitors on census night, and includes people usually present but temporarily absent.

Income

People aged 15 years or more were asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

Industry (of employment)

This variable describes the industries in which employed people (aged 15 years and over) work, and is coded to the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (Cat. no. 1292.0). The 1991 data have been adjusted to conform with the categories used in 1996.

Labour force

The labour force is made up of employed and unemployed people aged 15 years and over

Labour force status

Labour force status identifies whether a person aged 15 years or over is employed, unemployed or not in the labour force.

*Employed* — includes those people who, during the week prior to census night, worked for payment or profit; who had a job from which they were on leave or otherwise temporarily absent; were on strike or stood down temporarily; or worked as unpaid helpers in a family business.

*Unemployed* — includes people who, during the week prior to census night, did not have a job but were actively looking for work (either full-time or part-time) and were available to start work.

*Not in the labour force* — includes people aged 15 years or more who were not employed or unemployed as defined above. This category includes people who were retired, pensioners and people engaged in home duties.

Occupation (of main job)

This variable describes the main job held by employed people (aged 15 years and over) during the week prior to census night, and is coded using the ASCO — Australian Standard Classification of Occupations, Second Edition, 1996 (Cat. no. 1220.0). The 1991 data have been adjusted to conform with the categories used in 1996.

One parent family

A one parent family consists of a lone parent with at least one child (regardless of age) who is usually resident in the household. The family may also include any number of other related individuals.

Post-school qualifications

In all censuses since 1966, people aged 15 years and over have been asked to describe their post-school qualifications. In 1996, these responses were coded according to the *ABS Classification of Qualifications (ABSCQ)*, 1993 (Cat. no. 1262.0).

Student

A student is an individual who attends a secondary or tertiary educational institution on a full/part-time basis.

Unemployment rate

The unemployment rate is the number of unemployed people expressed as a percentage of the labour force.
